

Tortoise Global Water ESG Fund

(TBLU)

The Tortoise Global Water ESG Fund uses a passive management approach and seeks to track the net total return performance of the Tortoise Global Water ESG IndexSM.

About the index

We believe that the Tortoise Global Water ESG IndexSM represents the current global water landscape. It is comprised of companies that make conscientious efforts to positively impact the world environmentally, socially and with solid governance, and are poised to participate in and benefit from growth in the water industry. The index is a proprietary, rules-based, modified capitalization-weighted, float-adjusted index comprised of companies that are materially engaged in the water infrastructure or water equipment/services industries. Water infrastructure companies are those whose principal business is providing public water distribution or supporting/enhancing water distribution infrastructure via engineering, construction and/or consulting. Water equipment/services companies are those engaged in the business of producing water equipment, such as pipes, valves and pumps, or providing water services, such as filtration, treatment and testing.

A differentiated strategy

Purity	Sustainability	Investability
Minimum 50% water exposure	Environmental, social and governance (ESG) screen	Liquidity
<ul style="list-style-type: none"> Companies must (i) derive at least 50% of their revenues from water industry related activities, or (ii) derive at least 40% of their revenues from the water industry, be ranked in the top five companies by total revenue derived from any one water sub-industry, and whose principal source of revenue comes from the water industry Water infrastructure, principal business is providing public water distribution or supporting/enhancing water distribution infrastructure Water equipment/services, principal business is producing water equipment such as pipes, pumps, valves and water efficiency products, or water services, such as filtration, treatment and testing of water 	<ul style="list-style-type: none"> ESG Risk Rating less than 30 required for inclusion, provided by Sustainalytics* At least 80% of the market cap of the index must meet the required ESG Risk Rating criteria Any existing constituent whose ESG Risk Rating is between 30 and 39.99 for three consecutive quarters will be removed. Any constituent whose ESG Risk Rating increases to 40 or above will be removed at the next rebalance 	<ul style="list-style-type: none"> Minimum liquidity turnover of 0.15 for two consecutive quarters to enter the index Market capitalization of \$400 million for two consecutive quarters at time of index inclusion Including a liquidity threshold that is proportional to market cap results in an index that represents a universe that is actually potentially investible

*The fund commenced operations on 2/14/2017.

Effective 6/15/2018, the fund's investment objective changed to track the net total return performance of the Tortoise Global Water ESG IndexSM. Prior to 6/15/2018, the fund's investment objective was to track the total return performance of the Tortoise Water Index[®]. Underlying index performance is blended using the Tortoise Water Index[®] from inception to 6/15/2018 and the Tortoise Global Water ESG IndexSM after 6/15/2018.

Past performance is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Returns less than one year are not annualized. NAV prices are used to calculate market price performance prior to the date when the fund first traded. Market performance is determined using the bid/ask midpoint at 4:00pm Eastern time, when the NAV is typically calculated. Market performance does not represent the returns you would receive if you traded shares at other times. For the fund's most recent month end performance, please call (844) TR-INDEX or (844) 874-6339.

As stated in the Prospectus, the total annual operating expenses are 0.40%. The adviser has agreed to pay all expenses incurred by the fund except for the advisory fee, interest, taxes, brokerage expenses and other fees, charges, taxes, levies or expenses (such as stamp taxes) incurred in connection with the execution of portfolio transactions or in connection with creation and redemption transactions.

Index returns are for illustrative purposes only. Unlike the fund return, index return is pre-expenses and taxes. Index performance returns do not reflect any management fees, transaction costs or expenses.

Disclosures

TIS Advisors is the adviser to the Tortoise Global Water ESG Fund and is a registered investment advisor providing research-driven indices that can be used as a realistic basis for exchange-traded products and thought leadership in the universe of essential assets. Its indices are intended to fill a void in the market and provide benchmarks and investable asset class universes for use by investment professionals, research analysts and industry executives to analyze relative performance as well as to provide a basis for passively managed exchange-traded products. Exchange Traded Concepts, LLC serves as sub-adviser to the Fund.

This fact sheet must be preceded or accompanied by the current prospectus. [Please click here for current prospectus.](#)

Shares of exchange-traded funds (ETFs) are not individually redeemable and owners of the shares may acquire those shares from the ETF and tender those shares for redemption to the ETF in Creation Units only, see the ETF prospectus for additional information regarding Creation Units. Investors may purchase or sell ETF shares throughout the day through any brokerage account, which will result in typical brokerage commissions.

Investing involves risk. Principal loss is possible. Investment in the water infrastructure and management industry may significantly affect the value of the shares of the fund. Companies in the water industry are subject to environmental considerations, taxes, government regulation, price and supply fluctuations, competition and water conservation influences. Investments in non-U.S. companies (including Canadian issuers) involve risk not ordinarily associated with investments in securities and instruments of U.S. issuers, including risks related to political, social and economic developments abroad, differences between U.S. and foreign regulatory and accounting requirements, tax risk and market practices, as well as fluctuations in foreign currencies. The fund invests in small and mid-cap companies, which involve additional risks such as limited liquidity and greater volatility than larger companies. The fund is not actively managed, and therefore the fund generally will not sell a security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the index or the selling of the security is otherwise required upon a rebalancing of the index. There is no guarantee that the fund will achieve a high degree of correlation to the index and therefore achieve its investment objective. The fund has elected to be, and intends to qualify each year for treatment as, a regulated investment company (RIC). To maintain the fund's qualification for federal income tax treatment as a RIC, the fund must meet certain source-of-income, asset diversification and annual distribution requirements. If for any taxable year the fund fails to qualify for the special federal income tax treatment afforded to RICs, all of the fund's taxable income will be subject to federal income tax at regular corporate rates (without any deduction for distributions to its shareholders) and its income available for distribution will be reduced. Derivatives involve risks different from, and in certain cases, greater than the risks presented by more traditional investments. The fund is non-diversified, meaning it may concentrate its assets in fewer individual holdings than a diversified fund. Therefore, the fund is more exposed to individual stock volatility than a diversified fund.

The S&P 500® Index is an unmanaged, market-value weighted index of stocks that is widely regarded as the standard for measuring large-cap U.S. stock market performance. The Tortoise Water Index[®] is a float-adjusted, modified market capitalization-weighted index comprised of companies that are materially engaged in the

Nothing on this fact sheet should be considered a solicitation to buy or an offer to sell any shares of the portfolio in any jurisdiction where the offer or solicitation would be unlawful under the securities laws of such jurisdiction. Nothing contained in this communication constitutes tax, legal or investment advice. Investors must consult their tax advisor or legal counsel for advice and information concerning their particular situation.

Impact investing and/or Environmental, Social and Governance (ESG) managers may take into consideration factors beyond traditional financial information to select securities, which could result in relative investment performance deviating from other strategies or broad market benchmarks, depending on whether such sectors or investments are in or out of favor in the market. Further, ESG strategies may rely on certain values based criteria to eliminate exposures found in similar strategies or broad market benchmarks, which could also result in relative investment performance deviating.
